Michael,
I hope this helps,
Maryanne

Maryanne

You are correct, the totals should be reflective of the BDL without floodplain harvesting. In the effort to get everything out as part of the WRP and the WSP amendments it looks like we overlooked this
We have been pretty consistent in our statements the volumes of floodplain take will be greater than those in the BDLs. As we have discussed the critical issue is we are bringing the management of the floodplain take into the compliance regime. We are working closely with NRAR to ensure that from the start the compliance system is robust, but more importantly can be improved as our knowledge improves.

Thanks Peter,
So is the table not meant to add up?
Should the totals be removed from the table?
Regards,
Maryanne

Hi Maryanne
The Floodplain harvesting estimates for the updated BDLs will not be finalised until the current round of consultation is completed.
This is now expected to be completed after the state election. To date there has been one round of consultation with the next round expected in early to mid 2019. the state election in March may interrupt the process.
More information can be found at:

Hi Peter,
You may not have caught up on your emails.
Can you please advise on the missing numbers in the Gwydir BDL report (see email below),
Regards,
Maryanne

Hi Peter,
I'm just reading your Gwydir BDL report from your website & there are numbers missing in a table, which means the numbers don't add up:

Is it correct to infer that the Floodplain harvesting number for the MDBA BDL model is 17.8 & the new BDL is 149.9?

Regards,

Maryanne
