

## Annual report on compliance activities for [State]

This guideline has been developed to increase public transparency of compliance activity within the Murray–Darling Basin. The principle of the guideline is to support transparent, accountable, efficient and effective state responses to compliance allegations, to restore community confidence in the monitoring and management of non-compliance in the Basin.

The guideline has been prepared with reference to the National Framework for Compliance and Enforcement Systems for Water Resources and the Murray–Darling Basin Compliance Compact.

This reporting is to be undertaken at a state level for the Murray–Darling Basin area.

| Compliance & Enforcement Activity  | 2017-18 |
|--|---------|
| Number of meters read by compliance officers   |         |
