Subject: Visit to Lower Darling next week

Hi Katharine

Thanks for the short chat this evening.

As discussed, the Department along with Deloitte will be visiting the Lower Darling as I understand Tue / Wed next week, and are hoping to catch up face to face with a number of people with a range of different perspectives and interests, to feed into an options analysis we have commissioned Deloitte to do on long term water supply options for the Lower Darling. The project is a short project only, with a report due in September, and this will feed into broader design and consultation.

I understand that you will not be available, but if you are able to see if there are any people who might be available to meet with the team next week that would be great. I know it is short notice and a busy time, the team are also happy to seek input in other ways, such as telecon or in writing.

The specific purpose of this meeting is to seek input on a number of long term water supply options for Lower Darling users, including:

- Introduce an initial six water supply options for Lower Darling water users
- Identify any additional options or alterations to existing options that should be considered in the report
- Understand stakeholder views on the scope, risks or opportunities of each of the options being analysed.

Regards
Mitchell
